		<b>Q.1 Greenhouse Gas Emissions</b> Prominent mayors in the U.S.A. and Canada have committed their cities to follow the Kyoto Guidelines to reduce greenhouse gas emissions to pre-1990 levels. <i>If elected would you endorse similar measures through local initiatives in your community?</i>	<b>Q.2 Planning for Sustainability.</b> The path to sustainability means adopting a triple bottom line economic approach that ensures environmental, social and economic bottom lines are balanced. <i>If elected would you advocate for a triple bottom line in decision-making and town planning?</i>	<b>Q.3 Waste Management</b> York Region is contemplating incinerating waste yet not enough has been done to reduce, reuse and recycle, particularly in multi-residential units, businesses, institutions and schools. <i>If elected, would you advocate for a waste reduction approach that would use ways to reduce, reuse and recycle current waste streams through local initiatives?</i>	<b>Q.4 Pesticide Bylaws</b> Newmarket and Georgina have supported pesticide bylaws to protect the health and well-being of their residents. <i>If elected would you advocate for the implementation of a bylaw in your community?</i>
